| Winter vacation summary | At the beginning of the meeting, we showed the achievements in winter vacation: Front-end completed most parts of the pages and plan to finish the rest in this week Back-end completed the account functions and plan to finish the search function in this week based on the database crawled form the module catalog Web crawling has crawled the information form module catalog | | |

| | | | |
|----------------------|--|-----------|-------------|
| Problems & Solutions | <p>Most important problem appears on the web crawling.</p> <p>Modules in UNUK share the same module code but the same module information, so we just need to focus on the UNNC module information</p> <p>About Docker, we need to focus on it more in case our code does not fit in different machines</p> | | |
| Final Report | <p>According to Matt, to get a good mark in our final report, everything should be described in detail, for example, we develop the website based on Vue+Python, why we use these tools, how does these tools work compared to others developing tools.</p> | | |
| Actions points | <p>Zhihang ZHU: web crawling code should be showed to Matt next formal meeting</p> | | |
