

## Minute of Team 202113

Basic Information			
Date	2022.2.28	Location	PJ09
Time	15:30	Secretary	Haonan CHEN
Chairpesron	Yifei SHAO		
Attendance			
Present Member	Yuke GAO, Haonan CHEN, Yifei SHAO, Yongjing QI		
Absent Member			
Content			
Theme	Detail		
Work report	Cloud server has been set up and can view the pages through the URL  API between flask and vue allow data transition  FHSS problem about module information pdf file has been solved through MS word file transition		
Problems to be solved	The data structure of data from database is not allowed in data transition of API and still need investigation  Pages do not fit in mobile devices and Bootstrap needs to be		

Work distribution	considered		
	Back-end need to analyze the label for module information		
	Haonan CHEN: Keep investigating the API for data transition in databse		
	Zhihang ZHU: Try to convert vue file to html file for easy implementation		
	Yuke GAO: Analyze the label for module information		
Agenda	Yifei SHAO: Submit the information for cloud server examination		
	Yongjing QI: Set up front-end in cloud server and manage the cloud server		
	<div>Server We have already got an Aliyun server, where we have pushed the front-end pages on it. The only problem is there is an examine from government in order to get a domain name.  Front-end We haven't work on the compatibility on mobile devices already, and we want to temporarily skip the problem until we solve the problem on the connection between front-end and back-end.  Back-end There are some problems on transfer the data from database to the front-end, the problem is datatype(HTML- JSON) We are trying to solve the problem in two ways, until this Friday  Connection In this week, back-end developer is going to write interface documents to specify the methods name, input and output, front-end will follow the doc to add POST and GET request.</div>
